\$2.00 PER ANNUM

## COSMOPOLITAN HOTEL

### TO CHANGE HANDS

A change in the ownership and management of the Cosmopolitan Hotel takes effect on Saturday, the new proprietors to be Messrs. Mahoney and Johansen, of Calgary and Edmonton, respectively. Both are experienced hotelmen and we welcome them to our community.

Mr. and Mrs. Stevenson will be leaving for Calgary some time next week. Since coming here three years ago, Mr. and Mrs. Stevenson have made a host of friends, who regret their departure. Under their management, the Cosmopolitan has been recognized as second to none among the hostleries of Southern Alberta, and we have reason to feel that the good reputation established will be maintained.

## SPLENDID EXAMPLE OF UNION

At the evening service at the United church on Sunday last, the pastor, Rev. J. W. Smith, took occasion to refer to the uniqueness of the union that existed here. He felt that nowhere in Canada could a similar union be found. Here we have union services held in a Baptist church, the congregation being made up of original Presbyterians, Baptists, Methodists, Congregationalists and others, all working together in perfect harmony and radiating an influence for the general good of the community.

## PYTHIAN SISTERS HAVE

### VISIT FROM GRAND CHIEF

At the regular meeting of Greenhill Temple, Pythian Sisters, on Friday evening last, an official visit was made by Sister A. Powell, of Wayne, the grand chief of the Alberta domain.

An excellent exemplification of the beautiful and impressive initiatory degree was staged by a full team from the local lodge, following which the meeting was addressed by Sister Powell and others.

There was a record attendance of members from Coleman and Hillcrest. Following the meeting, refreshments were served and a programme of vocal and instrumental music was carried out.

On Tuesday night, a large number of members of Coleman and Blaimore temples accompanied the grand chief on a visit to the Hillcrest lodge, and on Wednesday night a grand rally was held at Coleman.

The various Pythian temples throughout the district are experiencing steady growth. Great interest is manifest in all meetings and undertakings and all meetings are largely attended.

While in The Pass, Mrs. A. Powell was the guest of Mrs. E. Elliott, of Blaimore.

A dance will be held in the Kootenay hall at Natal on Tuesday, October 11th.

## FIRE CONTROL OF

### INFANTILE PARALYSIS

Active steps to deal with the recent outbreak of poliomyelitis or infantile paralysis in various parts of the province have been taken by the provincial department of health, and every possible effort is being made to co-operate with local boards of health and the medical profession over the province in coping with the situation.

As a result of a conference of provincial, university and city health authorities, called by the minister, a campaign was outlined and some 15,000 copies of the special bulletin on infantile paralysis have been issued by the department and distributed to newspapers, physicians, local boards of health, school boards and other organizations. Special articles dealing with the disease have been prepared by the department and given wide publicity through the press.

Dr. Jenkins, provincial medical officer, has visited numerous centres in the province at the request of local physicians and local health officers, in some instances to assist in diagnosis, and in others to render advice with regard to handling local problems.

A summary of the most recent literature on infantile paralysis has been prepared by the department and a copy of this has been forwarded to every physician in the province. The department is also in communication with the international health division of the Rockefeller Foundation and with medical authorities in the old country to ascertain any developments in connection with the disease coming under their notice recently.

The provincial board of health at a meeting held on September 14th, decided to instruct local boards of health in municipalities in the province where infantile paralysis has occurred, to order that children under 18 years of age be not permitted to change their place of residence to points outside the municipality in which they reside unless a permit granting such permission has been issued by the local board of health of the municipality in which such children reside. Copies of the above notice of action of the provincial board have been forwarded to the secretaries of all local boards of health, to all medical health officers and all postmasters in the province, in order to prevent as far as possible the spread of the disease from one district to another.

Mr. Bennett, manager of the Fernie branch of the Canadian Bank of Commerce, was a visitor to Blaimore on Monday.

A challenge having been made as to the right of Charles Porritt, editor and publisher of the Drumheller Review, to sit on the council-board of the coal city, because of advertising and printing contracts, the matter was referred to City Solicitor Hayden. His ruling under the Alberta statutes holds that Editor Porritt is quite eligible to sit as alderman, no uncompleted contracts for services of work remaining unfilled. The question aroused considerable editorial comment in the provincial press.

An entertainment of a very high order was given at the United church on Monday evening by Miss Theresa M. Siegel, of Calgary, assisted by local talent. Miss Siegel's programme consisted of humorous, dramatic and inspirational numbers, all of which were very much enjoyed. Local artists assisting included Miss Alice Hornquist, pianoforte; Mrs. J. A. Kerr, Mr. R. W. H. Pinkney and Mr. J. R. Gresham, vocalists, and Mr. Eric Hornquist, violinist. The chair was occupied by Rev. J. W. Smith, assisted by Rev. J. L. Wright, of Bellevue.

## PASSING OF YNYSDDU WORTHY

The remains of another old inhabitant in Mr. John Williams, 23 Glenview, were laid to rest on Saturday. He resided with his daughter, Mrs. Guerdon, and, after a long illness, passed away at the age of 67. Deceased was well known and highly respected. He was born in the district, where he spent all his life. He saw the village changing gradually from an agricultural village into a busy industrial township. As a boy, he worked on the old tram road conveying coal to Newport. He had pleasant recollections of infancy, and years ago he worked at the local stone quarry, then owned by the late Mr. John Williams, the father of Mrs. J. Smith, Brumford. For a time he labored at a stone quarry at Pontypridd, and walked every day from Ynysddu to the scene of his labor. He was a hardy all-round man, and an exceptionally clever craftsman, especially in farm work and gardening. He used to be a regular and successful exhibitor at the local agricultural shows.

The funeral took place on Saturday at Twynwyn. The Revs. A. F. Harris, Twynwyn, and Payne, Glynn, officiated. A large number of people had gathered to pay him their last tribute of respect. The mourners were: Mr. and Mrs. B. I. Guerdon; Mr. and Mrs. A. Lewis, Mr. and Mrs. L. Sutor, Mr. and Mrs. L. Davies, Mr. and Mrs. Penny, Mr. and Mrs. T. Davies, Miss Maggie Williams, son-in-law and daughters; Haydn, Melville and Iswyn, grandchildren; Mr. and Mrs. J. George, Cardiff; Mr. and Mrs. Ned George, Bedwas; Mr. and Mrs. George, Caerphilly, brothers and sisters-in-law; Mrs. Polly Pullman, Pontypridd; Mr. and Mrs. M. Davies, Pontypridd, brother and sisters-in-law; Mr. and Mrs. Strockland, Pontypridd; Mr. and Mrs. Evans, Pontypridd; Mrs. W. Evans, nieces and nephews; Mr. W. Pembro, R. Jones, Mr. and Mrs. T. Pembro, Giffach; Mr. and Mrs. Bream, Mr. and Mrs. Sam Williams, Caerphilly; Mrs. Hannah Woodford, cousins; Mr. Albert Harries and Mr. W. Harries, Wattle-bean. The bearers were Mr. George Bevan, Mr. J. Hutchinson, Mr. H. Everson, Mr. W. Jenkins, Mr. W. Sage and Mr. D. Davies. Mr. Ellis Williams, Newbridge, was the undertaker. Weekly Argus, Wales, of September 18th.

The late Mr. John Williams was the father of Mr. Thomas Williams, of Blaimore, with whom we extend sympathy.

Mrs. W. A. Martin, of Lethbridge, who had been visiting here with Mrs. Robert Gray, has returned home. Mrs. Martin is a past grand chief of the Alberta Pythian Sisters and was present at the meeting here on Friday night.

The marriage of Albert Ernest Gale to Miss Muriel Jean, daughter of Mr. and Mrs. Arthur Shearer, took place at the United church manse on Wednesday, September 21st, Rev. J. W. Smith officiating. The young couple have taken up residence at McLaren's Mill.

The Sovereign Grand Lodge of the Independent Order of Oddfellows, in session at Hot Springs, Arkansas, took a big step forward educationally when it went on record for the establishment of a loan fund for the underprivileged sons and daughters of the members of their order and its branches.

## ST. LUKE'S CHURCH,

### BLAIRMORE (ANGLICAN)

Services, Sunday, October 2nd.—Harvest Festival at 7 p.m. Special preacher, Rev. Neville Blant, late curate at the Pro-Cathedral, Calgary, and now rector of Pincher Creek, Alberta. Mrs. Ashbridge, of Coleman, will sing a solo.

Offerings of fruit, flowers, vegetables and grain will be thankfully received at the church on Saturday from 2 to 6 p.m.

At this service, the incumbent hopes that members and those interested will give as they can, so as to help to make up the assessment for 1927, amounting to about \$50.

Also, do not forget the pantry sale and tea on Saturday, October 8th, from 2 to 6 p.m.

A. D. CURRIE, Incumbent.

During the official visit of Sister A. Powell to the Pythian Sister lodges of this district, she was accorded a most royal welcome. As a token of respect, she became recipient of the following gifts: silver bread plate from Greenhill Temple No. 10, Blaimore; silver fruit dish from Mizpah Temple No. 9, Hillcrest; and a cut-glass fruit bowl from Progressive Temple No. 3, Coleman.

## SHOWER GIVEN

The following is clipped from a Vancouver daily. The Miss Edna Graham referred to is better known locally as Miss Edna Cross, former resident of Blaimore, whose father was accidentally killed here a number of years ago, and who now resides with her mother and sister at Vancouver:

"A very jolly party and unique shower was given by the friends of Miss Edna Graham, a charming bride-to-be of this month, at the home of Mrs. Knight, Dundas street, on Wednesday evening. It took the form of a breakfast sunshine shower, the gifts being presented on a table set for breakfast, with a color scheme of yellow, representing sunshine from the lustre value of montrealia which centred the table."

"Others present were Mrs. W. T. Graham, Mrs. R. Sparks, Mrs. C. Farrell, Mrs. Vey, Mrs. M. Porter, Mrs. Wierick, Mrs. K. L. Craig, Mrs. A. L. Derrick, Mrs. L. Foster, Mrs. J. F. Bennett, Mrs. C. Vage, Mrs. W. J. Bain, Mrs. J. Newton, Mrs. Benson, Mrs. Spence, Mrs. H. E. Wilkerson, Miss K. Burbridge, Miss M. Deans and Miss F. Wilkerson."

## SHOULD USE MORE BRITISH MADE GOODS IN CANADA

Ottawa.—An unusual angle on Canada's imports from the United States was explained by Hon. James Macdonald, minister of trade and commerce, speaking at the annual banquet of the Bread and Cakes Bakers' Association of Canada here. Mr. Macdonald pointed out that goods valued at many millions listed as imports from the United States were in reality British imports.

The most striking example of this was the \$25,000,000 worth of rubber automobile tires that came to Canada through the United States and appeared in the trade balance as U.S. imports. As all raw rubber came from British possessions Canada's imports of this commodity from the U.S. really constituted a British import via the U.S. Owing to the great quantities used there it could be imported more cheaply, the trade minister said.

Up to the present time fruits from the West Indies came under the same heading. Now, however, the Canadian government had established direct steamship lines with the West Indies and it was hoped that in future fruit for consumption here would arrive through Canadian ports.

Mr. Macdonald's address was a plea for the greater use of British made goods in Canada.

Speaking on immigration matters Mr. Macdonald asked if it was not a wiser policy to continue a sane method of selective immigration from the six countries and northern Europe rather than flood the land with undesirable to the detriment of native sons and daughters.

The speaker thought Canadian bakers had a record to be proud of. During the war Canada enjoyed the cheapest bread in the world and there had been no profiteering among the bakers, he said.

## League May Meet in Ottawa

Canada Planning To Invite Council To Meet Here

Geneva.—Canada, recently elected to a non-permanent seat on the council of the League of Nations, is reported to be planning to invite the council to sit at Ottawa. In fact there is a projected scheme to have the whole League assembly meet there in order to give American newsmen and League sympathizers a ready occasion to study its workings at first hand. This project is still in abeyance. It seems certain that one of the council's meetings in the near future will be held in Berlin.

The Maharajah of Kapurthala, one of the chief reigning princes of India, would like to see a session of the League council held in Delhi, India's capital, at some not too distant date.

Speaking to a correspondent today, he asserted the governing classes in India are doing all possible to interest their people in the aims and aspirations of the League.

## Defeat Of Dempsey

Gene Tunney Retains Heavyweight Championship Of World

Chicago.—Gene Tunney proved himself worthy of the heavyweight champion of the world by decisively defeating Jack Dempsey in the second round bout which had fought for the title.

The battle, the greatest ring spectacle ever witnessed, was fought before a record crowd of nearly 150,000 persons, with receipts totalling \$2,800,000, the largest in recorded history. The champion in 35 minutes earned \$100,000 and the defeated challenger \$450,000 for his comeback try. These magnificent figures have eclipsed by far previous records.

Beaten to the dust of the canvas by a terrific left hook in the seventh round, Gene gallantly got up and came back to whip his dangerous opponent.

Bleeding and bruised, Jack Dempsey reached the end of his career in the ring when he could not follow up that one terrific blow which had the champion on the floor.

## Study Einstein's Theory

Geneva.—Two Belgian scientists, Professor Piccard and Dr. Stahel, have installed a physics laboratory on the summit of High Stain, 5,905 feet above sea level. Their object, especially, is to make a study of Einstein's theory of relativity. American and English scientists are invited. It was said to visit the new laboratory.

W. N. U. 1709

## Freight Rates Case

Reasons For Freight Cut Are Given By Board

Ottawa.—Reasons for judgment in the general freight rates case were made public by the Board of Railway Commissioners. The judgment itself was handed down on August 25 following an extensive investigation of railway freight rates throughout the Dominion. The judgment provided more or less extensive reductions in rates on grain and other commodities for export.

The reasons issued recently cover 200 pages and review in detail the hearings in the different parts of Canada, together with the conclusions arrived at by each of the commissioners. In the main, Chief Commissioner H. A. McKewen, Assistant Chief Commissioner McLean, and Commissioners Veen, Dwyer and Lawrence are in agreement on the main points covered in the August judgment, namely: Transcontinental rate scale; terminal tariffs; different standard mileages, East and West; and domestic grain rates to British Columbia.

Commissioner Oliver submits a number of conclusions differing some from those of other members on the board. A schedule dealing with 59 various individual applications is being prepared and will be issued by the board within the next week.

## Impressed With Canada

Grandson Of Famous "Iron Chancellor" Paying Visit To Dominion

Ottawa.—Count Gottfried Von Bismarck, a tall, blonde, good-looking young German, whose grandfather, Prince Otto Eduard Leopold Von Bismarck, was the famous "Iron Chancellor," arrived in Ottawa from Chicago to spend the next few days in the capital. Count Bismarck is interested particularly in agriculture and he visited the Dominion Experimental farm here.

The young count has seen something of the Canadian west, as from Winnipeg he visited the Manitoba wheat fields. He said he had been greatly interested in the operations of the Canadian wheat pool. "The Winnipeg Grain Exchange. He was impressed also with the extent to which machinery is used on the western farms—far more, he said, than in Germany, where farms were smaller and labor less expensive.

## Silk Train Wrecked

Valuable Cargo Tumbles Down Embankment Near Train

Vancouver.—Raw silk valued at \$250,000 was lying in the Fraser River and on the bank of the stream near Yale, east of here, as the result of the wreck of a Canadian Pacific Railway special silk train travelling east. The train, consisting of 18 cars destroyed telegraphic communication along the Canadian Pacific Railway track, when ten cars lurched down the bank.

Five cars tumbled into the turbulent waters of the Fraser River, while the five others were arrested in their fall by rocks and trees.

## Canada's Auto Production

August Increase Fifteen Per Cent. Over July Output

Ottawa.—Production of automobiles in Canada during August totalled 12,236 cars, an increase of 15 per cent. over the output of 10,587 units in July, which was the lowest month this year, but 18 per cent. under the 15,261 cars reported for August of a year ago.

Production in August of this year included 2,485 open passenger cars, 7,003 closed passenger cars, 2,322 trucks and 716 chassis. Of the 716 chassis, 651 were intended for passenger cars, 12 for trucks, and 53 for either passenger or freight service.

## Suspend Code Sub-Section

Regina.—That subsection of the criminal code which forbids an alien to be in possession of a short gun, rifle or ammunition is to be suspended in so far as it relates to the Northwest Territories the Gazette notifies. The suspension is brought about by representations of the R.C.M.P. that to prohibit such weapons would be to deprive trappers of their means of livelihood. There were other considerations too.

## Receive Higher Wages

Berlin.—Instead of taxing bachelors, Germany is considering paying bachelors employment of the government more than the married men. At a conference in the foreign office regarding a nation-wide increase in wages, the minority report asked higher wages for bachelors because living is more expensive for them as they have no wives to cook for them and spend much more on amusements.

## Protest Tariff Change

Manufacturers Of Cutters and Buggies Object To Reduction In Duty

Ottawa.—Manufacturers of buggies and cutters protested to the tariff board against the application of the Consumers' League for a reduction of the duty on these articles. The manufacturers asked that the duty be retained and that the sales tax be removed. This would save the purchasers \$4 to \$6 on buggies and \$15.00 to \$3 on cutters. Approximately 3,200 buggies were sold in Canada every year, it was stated.

R. J. Beuchman, of the Consumers' League, argued that the existing tariff was more than enough to protect the industry. A buggy that cost \$95 in the United States cost \$109 in Canada. The Canadian industry, he said, had a pretty full measure of protection.

## U.S. Ambassador To Mexico

Washington.—Dr. W. Morrow, the New York banker, has been selected by President Coolidge to be ambassador to Mexico. The Washington Government has obtained the Mexican Government's sanction of the selection. The post has been vacant since Ambassador Sheffield resigned last July.

## COSGRAVE MAY CARRY ON FOR ANOTHER YEAR

Dublin.—President Cosgrave's disappointing outcome of the parliamentary election, intends to carry on with the expectation of at least a year of life. In making this announcement, Hon. Ernest Blythe, vice-president of the council, stated that a new law will be floated in December.

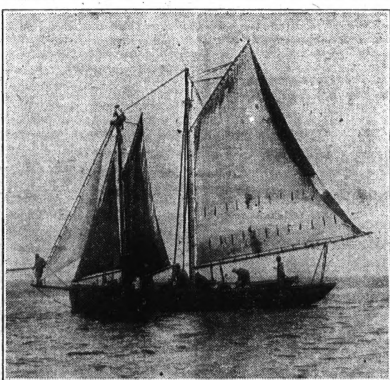

The ministers, all of whom were re-elected, are confident it may be taken from this, that when the new Dail convenes October 11, it will approve the continuance of Mr. Cosgrave as president of the council and that he will accept the mandate.

There is no doubt, observers say, that such an outcome would meet with the wishes of the business community throughout the Free State, regardless of political affiliation.

It is realized, however, that this administration will have to go willy nilly and that its success will depend upon how far it is able to carry out its promises of the minor groups in the Dail. Although the farmers, with six deputies, and the Independents with twelve, are commonly ranked as government supporters in the Dail, their attitude is not one of solid adhesion.

In fact, P. F. Baxter, leader of the Farmers' Party, who lost his seat in the election, is quoted as saying at Cavan recently that as President Cosgrave had not secured a definite mandate from the country the alternative was to make way for the Panna Fall and give Eamon de Valera a chance to prove his policy practicable.

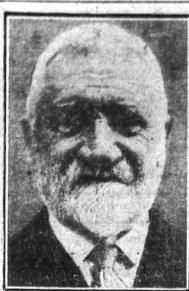

There is a suggestion that Mr. Cosgrave may offer a government portfolio to a member of the Farmers' Party and that in this case the party would vote solidly for him.

Baldwin Sees Whaler in Action

Premier Baldwin's bird's eye view of the phases of Canadian activity did not end as the Canadian Empress of Scotland steamed out of the harbor of North Sydney recently towards the Premier's homes. When only a short way out a seventy-five year old whaler seen above crossed the bow of the huge liner for the purpose of demonstrating to the Premier just how their operations are carried out. The photograph shows

## Will Attend Convention

Acton Burrows, Toronto, Ontario, will be an interesting delegate at the Dominion Conservative party convention in Winnipeg. He was one of the secretaries at the Conservative convention in 1928—nearly half a century ago—when Sir John A. Macdonald's famous national policy was launched and he has the original of the resolution that was passed on that historic convention.

## To Aid In Defence

New Zealand To Help Pay Expenses Of Singapore Naval Base

Wellington, N.Z.—Premier Coates introduced in the House of Representatives the government's naval defence proposals, of which the chief feature is a contribution by New Zealand to the Singapore naval base.

The premier said that the proposals would bring New Zealand's expenditure on naval defence up to ten shillings (about \$2.50) per capita.

"No affront to Japan was contemplated in any way by the construction of the Singapore base, he said, adding that Japan's action in the great war had been unforgettable, especially the visit of Japanese warships to New Zealand waters to assist in the convoying of troops.

Considering the long trade routes to be defended by Great Britain, Premier Coates said, New Zealand was going to shoulder a fair share of the imperial budget.

The proposals were adopted by the house 51 to 10.

## Wheat Pool and Prices

Pool Will Not Be Used To Boost Prices To The Consumer

Ottawa.—There was no cause for alarm or reason to expect that the farmers would use the wheat pools to boost the price of wheat, Hon. W. R. Motherwell, federal minister of agriculture, told the convention of the Bread and Cakes Bakers' Association in session here. Hon. Mr. Motherwell spoke on "Co-operation" and said the wheat pool was by far the best measure which had ever been taken by the farmers for their own prosperity and consequently for that of the entire country.

It would be virtually impossible, he said, for Canadian farmers to hold wheat for any length of time with a view to raising the price. Outside competition was too great from the point of view of exporters, he said.

## Three-Motor Plane

Ready For Flight

Will Leave North Sea Island On Trans-Atlantic Trip

Berlin.—Despite vigorous denials by directors of the Junkers Aircraft Works, it was learned from an unquestionable source that the G24, a three-motor plane, has been made ready at Malmö, Sweden, for a trans-Atlantic flight and may arrive at any time at Norderney, the North Sea Island which was a German airplane base during the war.

The plane, it was learned, will be piloted by Friedrich Loebe, one of the Bremen pilots on the recent unsuccessful Junkers trans-Atlantic venture, and by Herr Starke, who is regularly employed at Luftwaffe's test station at Kiel, but who has taken a leave of absence to make the trans-Atlantic crossing.

The flight is planned to proceed in stages by way of Lieben and the Azores, and then probably to Bermuda, although it is possible that the route may shift to Newfoundland. Dessau, Germany—Junkers' officials here said that a type of their G-24 machine was ready for a trans-Atlantic flight to the United States, but in case the Junkers Corporation had nothing to do with the project.

They stated that they had merely sold the plane some time ago to a north German undertaking.

## Mission School Tragedy

Grey Nuns Sister and Nineteen Children Perish in Flames

Big Blizzards—Death and desolation today stalk in the frontier outpost of civilization at Deauval, a hamlet 150 miles north of here.

There the bodies of 19 children ranging in ages from six to twelve and that of a woman lie waiting for a coroner's investigation. All were victims of a midnight blizzard that swept the Roman Catholic mission.

From the meagre details the fire swept the three-story frame building with only one escape that in three or four minutes the entire structure, timber like, through lack of rain for some time, was enveloped.

The victims are 19 pupils of the school and Sister Lea in charge of the dormitory where the fire was first discovered. In addition, a priest was so badly burned in the rescue work that he is not expected to live.

Forty-six children were saved from the inferno.

The fire is believed to have started in the centre of the building, close to the furnace, and spread towards the boys' dormitory.

## SOVIETS CAUSE STRONG PROTEST FROM FRANCE

Paris.—The storm which has been hovering over the head of Christian Rakovsky, Soviet ambassador to France, has burst at last. Le Matin announces that France has officially informed the Moscow government that Rakovsky's conduct is an indispensable condition to any negotiations for a non-aggression pact with the Soviets.

Furthermore, the French ambassador, M. Herbet, was instructed to say the Soviets must give practical proof of their intention to live up to both in spirit and in letter, to their solemn undertaking, entered into in 1924, to abstain from all interference with France's internal affairs, by ordering their agents and those of the third or communist international, to cease activities in France.

In addition, France requires that the Soviets take active steps to bring to a conclusion the long drawn negotiations for settlement of Russia's debts to France.

Only when these conditions have been scrupulously fulfilled, Mr. Herbet was instructed to say, will France consent to open negotiations for the treaty of non-aggression recently proposed by the Soviet government.

The latest Franco-Russian crisis, thus brought to a head, began when Ambassador Rakovsky signed, as a member of the Russian communist party, committed a manifesto urging the soldiers of all nations to mutiny and overthrow the bourgeois governments.

This raised a storm of protest in France and repeated representations were made to Moscow. Foreign Minister Titcherine, of the Soviet Government, at first disapproved, and then, formally disavowed M. Rakovsky's action, but took no steps to recall him.

Instead, Titcherine offered to enter into a treaty of non-aggression and non-interference in internal affairs.

## WOULD LOCATE ALL DOUKHOBORS IN ONE COLONY

Winnipeg.—A plan which has as its ultimate goal the concentration of all Doukhobors in a single colony in Western Canada was discussed by Peter Verigin, the younger leader of the sect and spiritual head of the Community of Universal Brotherhood, on his arrival here.

Mr. Verigin was accompanied by Paul J. Hruskoff, Poland, whom he had invited to visit the colonies in Canada, in connection with educational and cultural work.

Speaking through an interpreter, Mr. Verigin declared he was still ignorant of conditions prevailing among the Doukhobors in the Dominion, but stated that he was "anxious to meet his people."

A brief stop was made in Ottawa where Mr. Verigin conferred with Hon. C. A. Manning, Minister of Railways and Canals, and Hon. Robert Porke, Minister of Immigration.

Mr. Verigin intimated he was most anxious that the Doukhobors shall have the best educational advantages without relinquishing any religious tenets. Partly in furtherance of this plan, he invited Mr. Hruskoff to visit Canada, hoping through the latter's knowledge of modern education to evolve some plan of harmonizing the old customs, habits and ideas now extant. The education, he asserted, must be based on Doukhobor religious beliefs, an in keeping with the objective of the sect should be largely along agricultural lines.

"We are willing to give the Government our best energies, but not our souls," he declared.

Asked what he thought of recent charges that the Doukhobor colony was entirely Communist, Mr. Verigin said:

"It is Communism in a sense, but it is peaceful Communism, a positive Communism, based on religion. It is a Communism for all humanity, a true brotherhood."

As a question as to the wheat pool system of the West and the brotherhood's attitude towards it brought out the statement that the Doukhobors already have a system similar to that of the pool, with their own elevators and marketing system. There was no need as yet, Mr. Verigin stated, to consider joining the western wheat pool.

Following his visit to the colonies in Canada the Doukhobor leader said he intended to approach the federal government with further plans for the settlement of the Russian colony in the West.

There are approximately 15,000 Doukhobors in the Dominion, while more than that number are now in Russia.

## Amazing Development In Banking Business

England Opens New Bank Every Week Day

London.—Every week day in England a new bank is opened for business.

That is a plain statement of the amazing development in banking which is now taking place in this country under the direction of the "Big Five"—the five great joint stock banking corporations.

There is no parallel in the world to the immense growth of the English banks during recent years. Their financial power is beyond calculation. Bank deposits during the past twenty years have multiplied from £247,500,000 to the enormous figure of £1,848,174,000 or more than 245 per head for the population of the British Isles.

## Plane To Carry Sixty Passengers

Paris.—Charles A. Levine is planning to return to the United States on October 11 with three French engineers, with the intention of building a huge airplane capable of carrying sixty passengers across the Atlantic in regular flight, one of his closest advisers stated here. No further details of this project could be obtained.

## Falled By Few Miles

Montreal.—C. Meredith Jackson landed here recently after having been almost lost far out at sea in a 20-foot motor launch. They nearly made a trans-Atlantic trip in their small craft, and were picked up 30 miles off Newfoundland. They awoke in a cabin on board as they reached shore.

For students of languages who desire to study abroad this year courses are available in 60 educational centres on the Continent, according to the British Board of Education.

## STUPENDOUS UNDERTAKING

From a write-up in the Detroit News we learn of the stupendous undertaking of Henry Ford in the re-arrangement and additions of his automobile plant in Detroit. \$22,000,000 has been expended and the capacity of the plant has been doubled with the result that a new spectacle of voluminous production will be produced. 12,000 machines per day, 500 machines an hour or one machine about every seven seconds will be the result of each day's work. Better, larger and sturdier cars are to be made. The first samples are expected to be seen here about October 1st.

## Save My Page!

Three Scotchmen, McPherson, McDougall and McHenry were chums in the trenches. One night a shell burst over the trench where they were stationed and blew McHenry's head off. McDougall turned to McPherson and remarked: "McHenry's lost his head!"

McPherson, in great excitement asked: "What are ye saying—McHenry lost his head? Where did it go?"

"What difference does it make? It's gone," answered McDougall, philosophically.

"What difference does it make?" retorted McPherson. "Mebbe none tae ye, but he has me pipe in his mouth."

W. J. BARTLETT, PUBLISHER

Blairmore, Alta., Thurs., Sept. 29, 1927

DUTY IMPOSED ON  
CERTAIN U.S. FICTION,  
ENTERING CANADA

In accordance with the decision of the Dominion board of customs, August 18, 1927, the following works of fiction are no longer entitled to free entry into Canada, under tariff item 184:

Ace High Magazine, Action Stories, Adventure, Argosy—All Story Weekly, Amazing Stories, Best Stories, Black Mask, The Blue Book Magazine, Clues, Complete Novel Magazine, Complete Stories, Cowboy Stories, Cupid's Diary, The Danger Trail, Detective Story Magazine, Dream World, Flynn's Weekly, Frontier Stories, The Golden Magazine, Golden West Magazine, Lariat Story Magazine, Love Story Magazine, Live Stories, Love Romances, Moving Picture Stories, Mystery Magazine, North West Stories, The Popular Magazine, The Premier Magazine, Ranch Romances, Real Detective Tales, Secrets, Short Stories, Smart Set, Sport Story Magazine, Sweetheart Stories, Thrilling Tales, Thrills, Top Notch Magazine, Triplex Magazine, True Detective Mysteries, True Experiences, True Marriage Secrets, True Romance, True Story Magazine, The Underworld, War Stories, Western Story Magazine, Weird Tales.

The above are now subject to a duty of 25 per cent. The duty applies to "periodicals consisting wholly of fiction and not containing a reasonable amount of critical and descriptive articles, news items or articles relative thereto or to current topics, declared and entitled to entry under tariff item 184 as magazines."

Agitation for the damming of the flood of undesirable literature into Canada was promoted by the Canadian Printer and Publisher in the interest of the youth of the country.

Frank R. Kent, for many years Washington correspondent of the Baltimore Sun, writing in the "Independent," a journal published in Boston, speaks plainly on this matter:

"And not only have we produced a great smut crop of a coarseness peculiarly our own," he says, "but the more obscure of the French papers have now been translated into English and appear on the news stands

along with the originals. When you stop to analyze, scrutinize, and check up, there is here presented more reason for apprehension as to the future than any other single symptom in America today.

"The place to fully appreciate its proportions is in the smaller cities and towns, with populations ranging from 20,000 to 100,000—towns, for instance, like Fairmont, West Virginia, where one news dealer sells 2200 copies of every issue of a single monthly, exclusively devoted to stories of sex experiences and the nude in art; or like Steubenville, Ohio, where out of 110 periodicals on sale in a single store, 60 were either out and out a purulent type or bordered on the libidinous line.

"It is not the cheap and sexually suggestive fiction magazines, although these are many and rotten, that constitute the real shock troops of these paper battalions of literary indecency so much as the smaller and more compact nonfiction affairs frankly and exclusively given over to obscenities. Some of these are published in Chicago, some in Philadelphia, but most of them in Newark, New Jersey, and are issued by the same individuals under different corporate names. They mainly contain a rehash of the dirty stories and jokes told in the smoking rooms of Pullman cars or hotel lobbies.

"If you want to know whether these things are widely read, all you have to do is check up with any intelligent news dealer in any city, big or little, in any part of the country. The candid ones will not hesitate to tell you, not only that the demand for this sexual literature is enormous, but that there is no such thing as oversatiation of it. Those who buy one of these periodicals will buy every similar one on sight. The more you feed it the keener it gets. That is why there is a constantly increasing number of these things. As fast as one lewd venture is launched and successfully established, a little twin brother, under a different name and in a dress of a different color, is sent out and is equally successful with the same clientele."

## GUARD AGAINST PRAIRIE FIRE

Owing to the luxuriant growth of vegetation during the past season, which eventually will become inflammable, the chief fire inspector of the district desires to stress the importance of extreme care in the use of fire or matches where there is a possibility of burning up farm homes or destroying range country.

The Prairie Fires Act states that it is unlawful to kindle a fire and let it run at large; to kindle, or be a party to kindling, a fire for camping or branding purposes, and leave the same unextinguished; to kindle fire for the purpose of clearing land; burning stubble or brush, unless the land on which the fire is started is properly fire-guarded and watched during the whole period of its continuance; to neglect or refuse without lawful excuse, to proceed to a fire when ordered to do so by a fire guardian; to operate a threshing engine unless the requirements of the Act in that respect have been complied with.

In addition to such persons as may be specially appointed, all justices of the peace, members of the provincial police, Royal Canadian Mounted Police, Dominion forest fire rangers and councillors of municipal districts are ex-officio fire guardians.

Copies of the Prairie Fires Act may be had on application to Benjamin Lawton, chief fire guardian, Edmonton.

## Some Fish

The teacher was telling her open-eyed class about the dolphin and its habits.

"And, children," she said impressively, "just think, a single dolphin will have two thousand baby dolphins."

"Goodness!" exclaimed the bright little girl at the bottom of the class, "and how many do the married ones have?"

## MAY BE A GODSEND

## TO ALBERTA

The people of Alberta must not feel down-hearted because members of the Dominion board of railway commissioners have reported the cost of transportation from the coal mines there to points in Ontario to be so high as to negate the traffic. There is still hope of government action to bridge the gap between the freight rate the trade will stand and the freight rate the railway can carry for. But there is something more than that chance. In a letter to the press, Dr. T. E. Kaiser, of Oshawa, who represents his riding in the house of commons, draws attention to an extremely important process that has lately been perfected for the cheap reduction of lignite and bituminous coal to fuel constituents in a liquefied form. Of the origin of this process and of its economic merit he gives some account. The process was outlined by Dr. Frederick Bergius in a paper he read before the international conference on bituminous coal at Pittsburgh. After great expenditure of time and labor and money the liquefaction of coal by means of hydrogenation was brought to pass "in a technically practicable and economically satisfactory form." Factories for thus rendering the essence of the coal have been established at two points in Germany. These factories, it is estimated, will produce about 1,000,000 barrels per year. If the process is as satisfactory as it is reported to be, it should mean no less than a godsend to regions like Alberta that have vast deposits of bituminous coal and lignite shut out from the markets of consumption by cost of transportation. Dr. Kaiser proposes that the right to the use of his process in Canada should be obtained by the Dominion government. That the government could then control applications of the process and protect producers and consumers alike against excessive charges for the use of it. He rightly deems the matter important enough to be brought before the Conservative national convention, which meets in Winnipeg on the 10th of next month. The development of Alberta's coal resources is a matter of immense importance, not only to the province in which they lie, but to Canada as a whole. If in a freight car whose full load of coal is 50 tons the oil product of 250 tons of coal can be carried, an immense expansion of the output of the mines of Alberta is at once assured. For the crude oil obtained from the coal, markets thousands of miles away can be reached. This matter should receive the serious attention not only of the Conservative party in a national convention assembled, but of all commercial bodies in Canada.

THE RETHURTHFUL  
/ COUNTRY PRETH

"We are thorry to thay," explained the editor of the Skeunk Weekly News, "that our comthping room wath entered lath night by thome unknown thoundrel, who thole every 'eth' in the ethabthlthment and thueceeded in making hith ethape undethected.

"The motive of the mithreath wath doubttheth revenge for thome thupthothed inthult.

"But it thall never be thaid that the petty thupth of any thmalth-thould villan hath dithabthled our preth, and it thith meeth the eye of the detestthble ratheth we beg to aththure him that he undethestthmated the rethourceth of a fith-clath newthpaper when he thithketh he can cripple it hopeethly by breaking into the alphabeth. We take thith ceethbthn to thay to him furtherthore that before next Thuthrday we eth have three thimeth ath many ethath ath he thole.

"We have reathon to thuthpect that we know the cowardly ththunk who committed thith ath of vandalththm, and if he thith ever then prowthng about thith eththabthlthment again, by day or night, nothing wath give eth more thaththfathcthan than to ththoot hith hith full of holeth."

## THE PASS FIFTEEN YEARS AGO

(The Blaimore Enterprise, 1912)

Miss Moir, of Winnipeg, has been engaged as teacher for the new sixth room at the local school.

Miss McCallum, of Calgary, has accepted a position on the teaching staff of the Frank school.

Sept. 19.—A French miner named Emile Genjambre was killed at the McGillivray mine at Coleman on Tuesday by a fall of rock. Genjambre was a member of the L.O.O.F.

The new addition to the Blaimore public school is nearing completion. The school has now six rooms and six teachers, as compared with four rooms last year. The enrolment is

A miner named Steve Kompan was found dead in the mine at Police Plains on Monday.

Mrs. Johnson, wife of Jack Johnson, the big heavyweight pugilist, died at Chicago last week. She was a white woman, daughter of Mrs. David Terry, of Graceland.

George Clair and bride arrived at Coleman last week from their honeymoon trip.

Sir Thomas Shaughnessy paid a visit to The Pass on Monday, spending several hours.

Fred W. Doubt left Sunday night for Winnipeg, to attend the L.O.O.F. grand lodge.

The little three-year-old son of Mr. and Mrs. Fabro, baker, tumbled from a moving democrat on Eighth Avenue on Saturday, receiving several cuts about the head and face.

W. J. Cole, is building an addition to his poolroom at Bellevue.

Bob Dicken has arrived at Bellevue from Toronto and has taken at position at Bellevue mine.

Sept. 26.—At the regular meeting of the town council on Monday night the tax rate was set as follows: town 15 mills, school 10 mills.

COMPOSITION OF  
OUR PARLIAMENT

The Hon. Hugh Guthrie wants more lawyers in parliament. It is a place where lawyers have their natural and useful places. But they already constitute nearly one quarter of the whole membership. An analysis made in January of this year showed (in 244 seats then filled) the following occupations most numerous represented:

Barristers 59, farmers 51, doctors 28, merchants 22, manufacturers 12, journalists 10, lumbermen 7, notary publics 7.

From the following occupations all ten premiers of Canada have been chosen:

Six were lawyers—Macdonald, Abbott, Thompson, Laurier, Borden, Meighen. Three were journalists—Macdonald (for a time at any rate, though originally a stonemason and contractor), Bowell and King, the last named a political economist as well. One, Tupper, was a doctor.

Lawyers, then, do appear to have their useful place in public life. But with 59 lawyers and 7 notary publics the house of commons should be able to struggle along.

What is wanted at Ottawa is not more lawyers or more newspaper editors or more lumbermen or more doctors, but men of whatever class or occupation, who have outstanding ability, plus integrity and public spirit, plus a knowledge of (and sympathy with) the needs and problems of the masses of the people.—Toronto Star.

Two men were discussing their private affairs in the smoke bar, when one of them said to the other, "I have always been your friend. Whenever people have said anything against you, I have always stood up in your defence. Only the other night I heard a man say that you were not fit to live with pigs."

"And what did you tell him?"

"I told him you were."

## BLAIRMORE UNITED CHURCH

Rev. J. W. Smith, Pastor

Serve the Church that the Church may serve you.

Services for Sunday, October 2nd, 1927, the Pastor in charge.

MORNING SCHOOL at 11 o'clock.

We begin a new series of studies this quarter, the subject of which will be "Jesus entering upon His life work."

AFTERNOON SCHOOL at 2. Parents are invited to send their children to this school. It is exclusively for boys and girls between the ages of 5 and 12. Young folks 12 years and older are invited to the morning school.

EVENING WORSHIP at 7:30. Mr. Smith's subject will be: "The Challenge of the Christian Faith."

CHURCH NIGHT—Wednesday at 7:30. These services are carefully planned so that they will last one hour. You can come to Church Night and know that when the clock strikes half-past eight you will be at liberty. Last Wednesday the study was the second in the series on the "Lord's Prayer"—"The Father's Abode."

Next Wednesday, "The Father's Name." On the first Wednesday of the month part of the time will be given to answering questions that have been handed in beforehand.

A question box is being provided and any serious question will receive an honest answer. It is felt that this method will be a source of help and means of grace to all earnest seekers after the truth.

RALLY DAY has been indefinitely postponed until all anxiety in regard to the health situation has been removed.

THINK THIS OVER—Violets blossom just where they find themselves, and send out a fragrance no matter what their surroundings.

LADIES' AID—The regular monthly meeting of the Ladies' Aid will be held in the church on Wednesday afternoon next, October 5th, at 2:45. All members and others who are interested are requested to attend.

The Ladies' Aid will hold their annual sale of work, etc., on Saturday, October 8th, in the Elks' hall.

DOMINION PROHIBITION  
OFFICERS WILL MEET  
PROVINCIAL EXECUTIVE

EDMONTON, Sept. 22.—Rev. W. W. Peck, educational secretary of the Prohibition Federation of Canada, with headquarters at Toronto, and Dr. Dan McLaughlin, general secretary of the Board of Evangelism and Social Service of the United Church of Canada, and a member of the executive and sub-executive of the Prohibition Federation will visit the four western provinces in October and consult with the provincial executive of the different prohibition associations with a view to securing a closer co-operation of all temperance organizations in a future policy on temperance education along scientific lines and also a more definite policy as to future prohibition legislation.

Two meetings will be held in Alberta. On Saturday, October 8th, these two gentlemen will meet the members of the provincial executive for the northern part of the province at the provincial offices, Edmonton; and on Monday, October 10th, they will meet with the southern members in Central United Church, Calgary. Temperance rally meetings are also being arranged in the two cities, at which both Dominion officers will speak.

The chairman and secretary of all local branches of the Alberta Prohibition Association are members of the provincial executive.

## RECOVERS NEEDLE

ST. EDMONDS, Eng., Sept. 22.—Fourteen months ago, Miss Dora Watkinson ran a needle into her foot. Only part of it was extracted at the time and she refused to consent to an operation. The other day, feeling a scratch in her tongue, she reached into her mouth and drew forth the remaining part of the needle from between two teeth in her lower jaw.

## COWLEY HAPPENINGS

Mr. Wycliffe, of North Fork, was a visitor to town the early part of the week.

William Cochran and N. Nicholson, of North Fork, are visitors to Calgary at present.

Cutting was again held up here by rains falling during the past week. However, a few days' cutting was done in spite of the ground being very soft and muddy.

Carpenters are now busy erecting the Roman Catholic church, which has been under consideration for several months. The new church is being built in the central part of the town and just back of the United church.

At a meeting of the school board, held on Saturday night, it was decided to re-open the village school on Monday last. The attendance has been rather poor, as several of the parents consider it the safer plan to keep their children at home for another week.

First Knut "What would a nation be without women?"

Second Ditto: "A stagnation, I guess."

The fat woman was rushing up and down the station platform trying to get aboard the train. Finally the conductor asked her: "Madam, which end do you want to get on?"

"Mind your own business and I'll get both ends on," was her response.

Insurance man: "You look like a good risk, Mrs. Malone, but will you kindly tell me what your father died of?"

Mrs. Malone: "Of can't rightly remember as to that, sor, but sure an' it was nothin' serious."

Expensive Remark.

Judge—Did you or did you not strike this woman?

Landlord—Your honor, I only remarked that the wallpaper in her apartment bore fingerprints.

Judge—Two years for knocking her flat. Next case.

Dr. Honey, of Edmonton, arrived here yesterday to assist Dr. Oliver, who has been appointed medical supervisor over the unorganized territory between Crow's Nest and Brockton in connection with the infantile paralysis epidemic.

Mr. T. Ponsilek returned from Calgary on Sunday last and is since sporting an artificial leg. The new limb is made of wood and is an excellent job. Tony has already been warned against taking that wooden foot in the bathtub.

Because D. A. Perry is supervising the painting and decorating of the exterior of the C.P.R. station at Strathmore, someone suggests that there is not much chance of getting any reduction in freight or passenger rates this year.

Ted Elliott says he never knew what hives were till he joined the painting bee at the United church.

Asking God, on our knees, to bless somebody isn't half as good as standing on our feet, reaching down and helping somebody.

Making a Convenience  
of a Business

Many there are who make of a legitimate and well-established business nothing but a convenience—a place from which to get odds and ends when there is no time to go farther afield. They do not hesitate to send their money away for many things they need, and which could just as satisfactorily and much more promptly be supplied by their home merchants and dealers. No business, no matter of what nature, can long exist on this sort of patronage. The public expect to receive services as and when they demand it; but many do not do their part in making this possible.

There are manufacturing industries with fairly complete equipment which, because of such lack of consideration, are idle much of the time. It must be patent to all that a busy plant can be operated much more cheaply than one which is working only on part time. Therefore, it should be the policy of all to place their business of whatever kind it may be with the local plant or factory to the end that it may be kept reasonably busy and thus be in a position to give its best service.

When it is printed matter of any kind, remember the plant and equipment of.

## The Blaimore Enterprise

Issued by the Canadian Weekly Newspapers Association

313 Manning Chambers, Toronto

WORLD HAPPENINGS  
BRIEFLY TOLD

Peter Verigin, the younger, has arrived from Russia to assume leadership of the Doukhobors in Canada.

The Canadian Government has proposed to Poland conclusion of a treaty of commerce and it is understood that negotiations will begin shortly.

Admiral Baron Sadaaki Kato, who commanded the Japanese fleet during the siege of Tsingtau, China, in the World War, is dead. He was a former chief of the Japanese naval board of education.

Dr. Edward Sapir, Canadian anthropologist, has been appointed to a full professorship at the University of Chicago, where he is in charge of the department of sociology and anthropology.

Five new commissioners for oaths have been appointed in Saskatchewan. They are: Peter Gross, St. Boniface; William H. Bruce, Kelsey; John P. Macdonald, Regina; W. H. Ellis, Saskatoon; and Walter W. Robertson, Saskatoon.

The memorial to Lieut. Richard Douglas Sandford, V.C., who drove the submarine G3, loaded with 15 tons of high explosive, into the pile works of the mole at Zeebrugge and blew a breach 150 feet wide, has been unveiled on the mole in Belgium.

Commander Richard E. Byrd says that he plans to leave New York next August on his South Pole expedition and that Floyd Bennett, who accompanied him on his flight to the North Pole, would be second in command of the party.

More than 1,243,000 gross tons of shipping, consisting of 656 motorships and steamers and 182 sailing vessels of 195 tons or more, were lost, broken up or condemned throughout the world in 1926, according to the annual wreck statistics report of Lloyd's Register of shipping.

Definite announcement was made at Calgary, Alta., that the Russian Government has renewed arrangements for purchasing 4,000 horses in Western Canada, including British Columbia. The animals will be of a higher standard than those shipped last year, and higher in price.

Homestead entries for the first five months of the present year in the four western provinces total 2,261, an increase of 2,381 for the corresponding five months of last year. Saskatchewan leads the list with 1,038 entries, followed by Alberta with 913, Manitoba with 273, and British Columbia with 87.

Partly Filled Silo  
Is Dangerous Place

Material When Settling Overnight Gives Off Deadly Gas

The partly filled silo became a sort of a death-trap taking its toll of lives every year. Silage in the early stages of fermentation, A. E. Perkins, dairy chemist at the Ohio Experiment Station, explained, gives off large quantities of carbon dioxide, which, if breathed instead of air, causes death.

This gas is heavier than air, and displaces air in the silo if not allowed to escape at an opening near the surface of the silage.

There is no danger when filling is in actual progress, but there is danger, Mr. Perkins declared, when the filling is interrupted overnight or longer. Even when the doors are put in no faster than the silo is being filled, the silage may settle enough during the night to form an enclosed pit higher than a man's head. The silo may thus become a death-trap by filling with carbon dioxide to the lowest opening.

This gas does not transform air in color or appearance, and the victim who enters the silo may be overcome by the gas without being aware of its presence. Carbon dioxide is not a poison, but kills merely by excluding air from the lungs.

Removing the doors down to the level of the silage before entering after the filling has been interrupted will let the carbon dioxide flow away and be replaced by air. Raising the cutter and fan for a short time, tile or in cutting, will agitate the gas and mix it with the air, rendering it harmless.

After fermentation is complete and the silo has been opened there is no further danger. First-aid measures consist in prompt removal of the person to fresh air and artificial respiration as in drowning.

If the average man was as good as he thinks other men ought to be it wouldn't be long until his vanity made him top-heavy.

There are three million volumes in the United States Library of Congress.

W. M. U. 1709

## Beauties Of Natural World

People Who See Them More Than Fortune Says Viscount Grey

"Of all the joys of life which may fairly come under the head of recreation there is nothing more great, more refreshing, more beneficial, in the widest sense of the word, than real love of the beauty of the world," writes Viscount Grey in "Fallodon Papers."

"Some people cannot feel it. To such people I can only say, as Turner once said to a lady who complained that she could not see sunsets as he painted them, 'Don't you wish you could, madam?' But to those who have some feeling that the natural world has beauty in it I would say cultivate this feeling and encourage it in every way you can. Consider the seasons, the joy of the spring, the splendor of the summer, the sunset colors of the autumn, the delicate and graceful bareness of winter trees, the beauty of snow, the beauty of light upon water, what the old Greek called the smiling of the sea.

Then we are bored, when we are out of time, when we have little worries, it clears our feeling, and changes our mood if we can get in touch with the beauty of the natural world."

Old Popular Pastime  
May Be Revived

Throwing Horseshoes Not Expensive and Tests One's Skill

The good old game of throwing horseshoes is being revived and bids to become one of the most popular pastimes of the day.

Voters of the game will be interested to learn that the world's record for women was broken at Bloomington, Illinois, when Mrs. Lennox, former world's champion, pitched six consecutive double rings, beating the former record of five and making an average of 823 points in one game.

The game of horseshoes is neither strenuous nor expensive, yet furnishes plenty of opportunity for testing one's skill and judgment along its own peculiar lines. So, if you are not in the golf class, try horseshoes.

## Reaper-Thresher Machines

Reaper-thresher machines are being introduced throughout the Brandon district. One company carried over 54 machines from last year and brought in 278 additional this year, nearly all of which have been shipped out to farmers. The majority are going to Saskatchewan with a number to Alberta.

## Winnipeg Newspaper Union

*Fashion*

A Modish Frock

Charmingly graceful is this attractive frock, having a tulle at each side of the slightly flared skirt. The bodice has gathered at the shoulders, a vestee and scalloped collar. The long sleeves are dart-fitted, loose, or gathered to wrist-bands, and a wide belt is finished with buttons at the front. No. 1651 is in sizes 36, 38, 40, 42 and 44 inches bust. If the dress is made of one material only, size 38 requires 3 1/2 yards 28-inch, or 3 1/2 yards 34-inch material. Views A and B, size 38, require 3 yards 28-inch, or 2 1/2 yards 34-inch material for the dress, and 1 1/2 yards 39-inch, or 1 1/2 yards 64-inch contrasting. Price 29 cents the pattern.

Shows How Nectovision  
Transmits Pictures

Scottish Inventor Gives Demonstration For Benefit Of Scientists

Many members of the British Association for the Advancement of Science seized the opportunity of witnessing demonstration of nectovision, a modification made by John L. Baird, the Scottish inventor, of his television system.

When the nectovision apparatus is used the subject whose image is to be transmitted sits in total darkness. In reality he is bathed in invisible infra-red rays. His image appears on the screen at the receiving end as a flickering, rosy glow, strongly reminiscent of the first moving pictures. The features are recognizable, but the infra-red rays produce a certain amount of distortion in color values.

"As in television, in which the person at the transmitting end sits in the glare of an ordinary artificial light, the eye is tricked. What may be called a clicking and chopping machine optically reduces the reflection of the face to tens of thousands of fragments. Each fragment is converted into the electric impulses at the receiving end and the impulses are converted into light fragments, each of which is placed in its correct position on the screen. This process occurs so almost instantaneous rapidly, so that the eye does not realize that it is assembling an optical mosaic and accepting it as a whole.

There is reason why total darkness should reign in the transmitting room when the infra-red rays are used for nectovision. Mr. Baird seats his subject in the inky gloom simply to drive home the point that their counterfeited presentations are being sent by invisible rays.

## Americans Buy Bank Stocks

No Significance Is Attached To Report That Control Is Sought

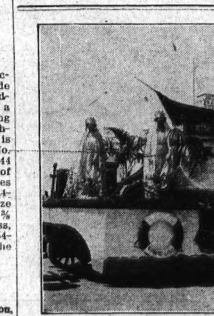

Announcement in New York of the formation of the two Canadian Bank investment trusts is not, apparently, creating uneasiness in official circles at Ottawa. Future developments will be followed closely, but the feeling is that the idea behind the trusts is merely the bona fide one of investment. American financial men, it is observed, are looking more and more to Canada as a field for investment; and, even at present prices, Canadian bank stocks offer a better return than American.

The Bank Act now provides that a majority of the directors of a Canadian bank must be British subjects, resident in Canada. This provision, it is thought, would be sufficient to check any attempt to secure foreign control of Canadian banks. But should such an attempt be made, although in official circles it is not thought likely—and the provision in the Bank Act does not prove adequate, Parliament could step in with an amendment to the act which would impose still more rigid instructions on the directors.

## Hobby Of Life Term Convict

A life term convict in San Quentin Prison, California, has asked for a bigger cell, basing his request on the flourishing condition of his prison hobby. Seven years ago he entered the prison and soon decided some hobby would be necessary to break the monotony of prison life. So he set about to collect the best works of modern authors. Today his library is filling up his cell so he scarcely can move about. But the warden says he has no larger cells, even for libraries.

Fox hunters of the south do not kill their quarry with firearms, but practice the hunt as do the English sportsmen.

This is an allegorical float of the first Cunard steamship, the Britannia, which in 1840 made its maiden voyage from Liverpool to Halifax, and inaugurated the first steamship service across the Atlantic. This float represented the Cunard Line in the recent pageant given before the Prince, Premier and Mrs. Baldwin, at Ottawa, in the conclusion of the World's Postage Congress. The pageant was held in honor of the delegates to the Congress, who came from all parts of the world.

## MISS THERESA CARRAGHER

First Aid Champion of Canada, who gave a demonstration at the Toronto Exhibition. Miss Carragher, who is an employee of the Canadian National Railways, in Edmonton, won the Page Gold Medal for the Women's Championship over the whole of the system. As the women's team from Montreal won the championship of Canada, Miss Carragher may be considered as the individual women's champion in first aid work in the whole of the Dominion. (Photograph Canadian National Railways.)

## Vastness Is An Asset

Canada Has Bridged Gaps That Were Obstacles To Nation-Building

In days gone by, Canada's vastness was a drawback and a liability. At one time it seemed almost impossible that a country of such wide spread territory could be moulded along national lines. The terrific gaps between centres of population, the wilderness of the north country, the forbidding mountains of the far West, all loomed as obstacles to nation-building.

But the gaps were bridged, the wilderness pierced and the mountains crossed or tunneled. Canada's vastness is now an asset. In this great country almost every natural resource may be found. And there is room for all our people and many millions more.

Some day, many wise thinkers believe, Canada will be the centre, the chief nation, of the British Commonwealth of Nations. Many stranger things have come to pass.

## Dying Flying Ambulance

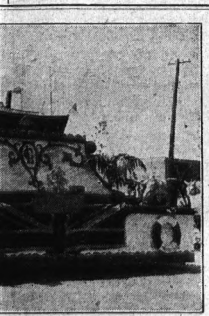

A flying ambulance for the isolated inhabitants of Lapland, in Northern Sweden, has been donated by a Swedish railroad builder, on the occasion of his birthday. One aerial ambulance already has been maintained in Lapland for the last three years. From the frozen wastes, it has made many rescues, carrying patients to the military hospital at Boden, Sweden's chief stronghold on the edge of the Arctic zone.

## Princess Enjoyed Joke

Princess Mary was among those who appreciated the joke when the band at a Manchester ceremony she was attending struck up the tune "Let's all go to Mary's house." The Princess had just laid a foundation stone at Manchester Infirmary, and as she stepped down from the platform the song was played. At once some of the onlookers took up the refrain and sang lustily the words, "And let's have a real good time."

Mrs. Jones—"You have a new maid. Evidently you realize a new broom sweeps clean."

Mrs. Smith—"Yes, that's true. Our new maid disappeared with the silverware."

This is an allegorical float of the first Cunard steamship, the Britannia, which in 1840 made its maiden voyage from Liverpool to Halifax, and inaugurated the first steamship service across the Atlantic. This float represented the Cunard Line in the recent pageant given before the Prince, Premier and Mrs. Baldwin, at Ottawa, in the conclusion of the World's Postage Congress. The pageant was held in honor of the delegates to the Congress, who came from all parts of the world.

SUNDAY SCHOOL LESSON  
OCTOBER 3

ELIJAH ON MOUNT CARMEL

Golden Text: "Choose you this day whom ye will serve."—Joshua 24:15.  
Lesson: 1 Kings 18.  
Devotional Reading: Psalm 115:1-3, 9-11.

## Explanations and Comments

"Elijah's Meeting With Ahab, verses 1-56.—After three years of severe famine in Samaria because of the drought, Ahab called Obadiah, his superintendent, and told him to go in search of water for their perishing horses and mules. He was met by Elijah, who ordered him to inform Ahab that rain was coming. Ahab came to meet Elijah. 'Thou troublest me,' were the king's angry words of greeting. Boldly Elijah retorted that the king was the real troublemaker, for he had forsaken the commandments of the Lord and had followed the gods of Jezebel.

"This even in a day of days the age-long dispute continued among contending factions assigning to one or the other of the rival gods the credit of the rainfall. In Christ's day it was the charge of the Pharisees that the Jews were teaching that the expression in Malachi, 'I will be subservient to the traditions of the elders,' was the restatement of truth. When 'loyalty to truth' finds its expression in Malachi, attacks upon those holding different views, the object is frustrated."—Record of Christian Work.

Then Elijah ordered the king to assemble on Mount Carmel all the priests of Baal and of the Asherah. The king did the prophet's bidding.

May Add Airplanes  
To Present Service

Matter Said To Be Under Consideration By C. P. R. Officials

In Canada about to adopt the airplane as a supplement to the transcontinental flyer, on a commercial scale? And the day and night cross country trips to be cut in half or third, as at present over a considerable section of Western Europe? Is air-mail for the Dominion an early development?

Immediate steps in these directions seem to be indicated by the movement being made to urge the Canadian Pacific Railway to add an air branch to its present service by which, it is said, is being pushed by Major-General J. H. MacBrien, former chief of staff, General MacBrien is at present provisional chairman of the Canadian Air League.

It is expected that MacBrien will be placed in charge of the railway's aerial department, if it materializes. He is himself a deft, experienced pilot, having taken the course at Camp Borden a year or so ago, and, in addition, has made an intensive study of aeronautics.

MacBrien's plans, it is said, have been studied and endorsed by C.P.R. officials. The railway is sounding out the federal government to see if it is prepared to assist in the early heavy expenditures by means of subsidies.

The announcement is being watched with the keenest interest, and there is much speculation as to whether the railway that was the pioneer in transcontinental development will also be a pioneer in this spectacular advance step for future transportation.

## Device For Typing Music

New Machine Would Greatly Facilitate Work Of Composers

A machine by which composers will be able to type their musical ideas in one or several copies, as easily as a letter is written by typewriter, has just been perfected by Lajos Viragh, a retired postal director. The model of the machine on which Mr. Viragh has been at work for three years, is constructed of wood and rubber, and should the manufactured machines prove as satisfactory as the model, the work of composers and those obliged to read manuscript music will be enormously facilitated.

## National Dairy Council

The annual meeting of the National Dairy Council of Canada will be held on November 21st and 22nd at the King Edward Hotel at Toronto, and it is expected that matters of considerable interest to the dairy industry of Canada will come up for discussion.

## Big Land Deal

Negotiations for the sale of 6,000 acres of land in the Madison district of Saskatchewan, 100 miles southwest of Saskatoon, were opened recently by the Canada Colonization Association, the purchasers being twenty Mennonite families, all in the Dominion but living in scattered districts.

The highest railroad in the world is the Central Railway of Peru, which reaches an altitude of 15,664 feet and maintains a station of 15,666 feet.

Designs Gigantic  
Air Liner

German Engineer Working On Plans For Super-Craft

Plans have been made by Dr. Edmund Rumpler, the German aeronautical engineer who designed the famous Zeppelin, or Dove, monoplane for the German army, for a giant air liner with wings so expansive and thick that they will provide space for cabins with bathrooms, dining rooms, lounges and promenades—accommodations for 135 passengers. It is expected that this Titan of the air will be able to cross the Atlantic in 20 hours.

Actually, plans for this type of airplane were drawn several years ago. In general outline they are as good as they ever were, for aerodynamic principles have not changed. Dr. Rumpler, with the dust blown off his blueprints, is talking more confidently than ever of the day when air voyages across the ocean will be as commonplace as steamship travel is now. He is too cautious to plunge boldly into the construction of a craft without careful preparation. He will reach his ideal trans-Atlantic airplane by easy stages. First, he will probably build a forty or fifty-passenger plane, and finally his largest ship.

Although a plane of such fantastic size has never been built, the project must not be classed as impractical. Scientific and engineering research has never yet failed the designers of aircraft. The same laws of applied physics that enabled Blériot to design the Columbia and to predict from the plans how fast it would go, how much it would lift, at what angle it could climb, will enable future designers to calculate the wing spread, motor power and tensile strength of the structural materials necessary for planes of far greater dimensions. Aeronautical engineering is an exact science, and experience since the Wright brothers' first flight at Kitty Hawk shows that superplanes are possible.

Scheme To Mobilize  
Doctors With Airplanes

New South Wales Would Encourage Medical Aid For Sparingly Settled

Shortly to be put into operation in this country is what its sponsors claim to be the most advanced and most romantic system of giving medical aid to the world. Briefly, the scheme is to mobilize air craft, each with an aeroplane waiting for a call by telegraph or radio, to speed off on urgent calls from sick or injured people in the sparsely-settled interior and northern areas of this continent. In a few months, it is declared, lonely stockmen in out-back areas need have little fear of receiving medical attention, should they fall sick or be injured hundreds of miles from an established medical centre. It is to be a scheme of heroic, pioneering women, who have gone forth to make a garden of the wilderness—the terror of bearing children removed from human aid—will be gone.

The Australian branch of the British Medical Association, an organization known as the Australian Island Mission, and the Federal and State Governments will co-operate in the scheme.

Looks Like Extermination

The 4,000 sportsmen who make returns to Saskatchewan gamekeepers department last year secured a total bag of 100,000 duck, 26,000 prairie chicken, 6,000 wild grouse, and 3,200 geese. In order to obtain some idea of the approximate bag of all hunters it is to be assumed that 12,000 who did not make returns secured the same average bags.

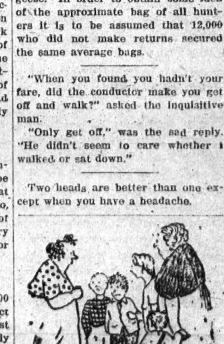

"When you found you hadn't your fare, did the conductor make you get off and walk?" asked the inquisitive man.

"Only get off," was the sad reply. "He didn't seem to care whether I walked or sat down."

"Two heads are better than one except when you have a headache."

"Imagine! The doctor told my husband that it was a microbe that made him lose his hair, and ever since he always calls me a 'microbe.'"

—Pages Gales, Tverdon.

This is an allegorical float of the first Cunard steamship, the Britannia, which in 1840 made its maiden voyage from Liverpool to Halifax, and inaugurated the first steamship service across the Atlantic. This float represented the Cunard Line in the recent pageant given before the Prince, Premier and Mrs. Baldwin, at Ottawa, in the conclusion of the World's Postage Congress. The pageant was held in honor of the delegates to the Congress, who came from all parts of the world.

**Here and There**

The late John Oliver, who came from England and commenced his Canadian career as a farm worker, and later rose to be premier of British Columbia, left an estate valued at \$75,913.

The idea that the Scot will not spend money was dispelled this month so far as travel is concerned by the thousands of clansmen who came a hundred miles or more by train or motor to attend the Highland Gathering at Banff, Alberta, held in September.

A shipment of antelope from Canada to the United States is shortly to be made. Charles Blazer, rancher, at Lake Newell, who has for years interested himself in the preservation of these animals, has contracted to deliver twenty-two head to a Texas buyer.

It has been announced that the representatives of the Cuban potato buyers have agreed to take nine hundred thousand bushels of New Brunswick potatoes this season. Negotiations are at present under way with the Cuban buyers for the sale of the Nova Scotia potato crop.

Increasing interest has been shown in the organization of boys' and girls' swine clubs throughout the province of Alberta and new clubs have been formed, among other places, at Picher Creek, Macleod and Raymond. The winning team in Alberta the Canadian Pacific Railway awards a trip to the Royal Winter Fair at Toronto.

The 4,000 sportsmen who made returns to the Saskatchewan provincial gamekeepers department last year secured a total bag of 100,000 duck, 25,000 prairie chickens, 5,000 ruffed grouse, and 3,200 geese. In order to obtain some idea of the approximate bag of all hunters it is to be assumed that 12,000 who did not make returns secured the same average bag.

An unfailing indication of farm prosperity is the increasing sale of agricultural implements reported by nearly all dealers in the west this year. The demand for hay-making machinery has been especially heavy, while the sale of threshers, binders, combines and tractors has been exceptionally large, some firms reporting from 100 to 200 per cent. increases in the sales of these implements.

When the Canadian Pacific Railway train bearing 125 delegates to the Canadian Chamber of Commerce convention arrived at Gravelly, B.C., recently, President S. R. Gundy requested that a brief stop be made during which the delegates paid tribute on the spot where the last spike of the Canadian Pacific transcontinental line was driven linking for the first time the East to the West. Mr. Gundy spoke briefly of the courage and vision of the builders of the railroad.

Alberta's potential coal wealth is greater than all the known coal deposits in the rest of the British Empire put together, according to Sir Thomas Holland, chairman of the Empire Mining and Metallurgical Council, recently at Calgary. "If the present endeavors to change coal into a fluid fuel, capable of displacing petroleum and all its products, are successful, Canada will take the place of the United States as the world's provider of liquid fuel," he further stated.

Consolidating a stay in Canada's ranch near Kamloops, B. C. the Marquess and Marchioness of Exeter accompanied by Lord and Lady Cecil, sailed from Quebec recently on the Canadian Pacific steamship Minnedosa for England.

An aeroplane passenger en route to the 25,000 ft. tobacco mine area was inaugurated on June 1 by the Western Canada Airways Limited, making the first commercial service to be operated in the Province.

Foundation work is proceeding rapidly on the new addition to the C. P. R. grain elevators at Fort McNeill, which when completed, will have a storage capacity of 6,000,000 bushels, instead of the present capacity of 4,000,000 bushels.

A total of 1,334 English boys have been moved from the Old Country and placed on farms in Quebec and Eastern Ontario by the British Immigration and Colonization Association according to the figures given out at the annual meeting of that organization.

According to figures of the Canadian Government, Canada led all countries of the world by a wide margin as an exporter of wheat, from August 1 to December 31, 1926. In that period Canada shipped 167,795,000 bushels, her closest rival being the United States with 94,191,000 bushels.

Days of the covered wagon were recalled recently. Mr. and Mrs. W. G. Barker and six children arrived at Bismarck, Saskatchewan from Parashell, North Dakota, in an outfit consisting of a covered wagon, 19 head of horses and four wagons carrying their household effects and farm implements. They leased a half section of land.

General individual travel through the Canadian west is expected to be very heavy this year according to R. G. McNeill, general passenger agent of the Canadian Pacific Railway at Winnipeg. Several important parties will also add to the number of travellers especially through the Canadian Rockies regions.

**Local and General Items**

Bassano is suffering from an epidemic of boy babies.

The Christie Grant Co. have opened a store at Cardston.

Ponoka Elks will build a hall, to cost in the neighborhood of \$15,000.

The regular meeting of the local school board will be held tomorrow night.

Miss Reddick has returned to Calgary after a couple of weeks' visit here with Mrs. H. Gibeau.

Mr. W. Munton, of Blairmore, is spending his holidays with his parents, Mr. and Mrs. H. J. Munton, in Inisfail Province.

No new cases of infantile paralysis have developed in this district and reports from Cowley state that the lone case there is improving.

Many local friends are very interested in O'Neill's movements, and have lately wondered what he means by furnishing new quarters.

Mr. Johan L. Johansen, of Edmonton, and Mr. and Mrs. John F. Mahoney, of Calgary, have arrived here to take over the Cosmopolitan hotel.

The new Ford has a rear axle housing of the banjo type, and there will be steel brake shoes on each drum. We were expecting a car, not an orchestra.—Financial Post.

The senior branch of The Catholic Women's League will hold their annual bazaar, in aid of St. Anne's church, on Tuesday, November the 15th. It will be bigger and better than ever. Further announcement will be made. Keep this date open.

The lantern of one of the largest lighthouses in the world, at Cape Race, Newfoundland, weighs 24 tons and displays a beam that can be seen by ships seventy-six miles at sea.

In the period from 1830 to 1926, inclusive, no less than 5,594,692 members were initiated into the Independent Order of Oddfellows. In the same period relief was handed out to 443,726 families.

**CHILDREN, SPARE THE BIRDS**

A sling-shot in the hands of a boy being aimed at a songbird eleven years ago was what gave the start to the nature study work of a Wisconsin woman's club which today is reaching an entire community with a message of conservation.

When the women of Burlington first saw the need of stating the case of the birds to the children of the community, they inaugurated a bird-house contest for boys and an essay competition for girls on the value of birds and their need for protection.

There was instant success. No boy would use a sling-shot on his bird neighbor, and woe to any other boy who attempted it.

Bird houses and bird baths were placed in the schoolyards, and the women followed up their initial success by a call for bird lists. To be sure, only fourteen came in the first year, but the next year there were thirty-five, and the third year more than one hundred, after which whole grades began to enter.

Junior Audubon societies in the schools, illustrated bird talks, a free motion pictures, posters, contests for essays, drawing and photographs, and free study material for use in the schools have been utilized to carry on the campaign.

The women of Burlington have recognized that legislation is not in itself sufficient to insure conservation, but by instilling the urge for protection they are building a community desire to safeguard birds, flowers, trees, all of nature's gifts to mankind. Thereby they are not only helping the cause of conservation, but benefiting those who participate in the work.

The residence of D. Oliver has been treated to decoration by Messrs. Brin and Hughes.

Someone has asked why rattle snakes are so scarce. Maybe Henry Ford is using 'em up.

Mr. J. E. Mansfield, representing the Miller Services Limited, Toronto, was in town this week.

In the year 1926, the Independent Order of Oddfellows throughout the world paid out in benefits and relief a total sum of \$7,861,263.

The Crows' Nest Chapter, I.O.D.E., will hold a Tea at the home of Mrs. Archer on Saturday, October 1st, from 3 to 6 p.m. Come and bring your friends.

LOST—A Gold Bar Pin, with onyx centre, between residences of J. M. Stewart and H. H. Griesbach. Finder kindly return to Mrs. J. M. Stewart.

Constable W. D. B. Munton, of the local detachment of the Alberta Provincial Police, has returned from a vacation spent with his parents at Inisfail.

The Ladies' Aid of the United church are holding their annual Halloween tea and sale in the Elks' hall on Saturday, October 29th. Please remember the date.

J. E. Terrill, formerly proprietor of the Terrill Floral Company at Lethbridge, has opened up an exclusive college floral shop in the university district of Seattle.

People of Kimberley are very much worried over the organization there of a barge band of healthy proportions. They claim that no greater calamity could have befallen Kimberley.

Mrs. Arthur Shearer leaves on Saturday for Kimberley to join her husband. In her honor, a farewell party will be given by the Pythian Sisters at the home of Mrs. Robert Gray tonight.

The Independent Order of Oddfellows and the Knights of Pythias, of Queens, L.I., will co-operate in the campaign to raise one million dollars for a 200-bed addition to St. John's hospital, Long Island City.

The senior branch of The Catholic Women's League will hold their annual bazaar, in aid of St. Anne's church, on Tuesday, November the 15th. It will be bigger and better than ever. Further announcement will be made. Keep this date open.

Alfred W. Lawson, one of the pioneer aircraft builders, is turning his attention to the construction of an airplane powered by twelve Liberty motors, capable of carrying 100 passengers and designed for passenger service between New York and Chicago.

Ernie Whiteside, one of Strathmore's most enthusiastic golfers, states that ministers are not usually good at the game, that somehow they never can manage the proper golf language in addressing the ball. "Of course," he says, "there are exceptions."

A most enjoyable entertainment, consisting of high-class humor, reflections and dreams, was staged at the Rex Theatre, Bellevue, on Tuesday night by Mr. Thomas Elmore Lucey. The theatre was crowded and the entertainment was thoroughly enjoyed by all.

The ladies of St. Luke's church are holding a tea and sale of home cooking in the Elks' hall on Saturday, 8th October, from 3 to 6 p.m. Contributions from members and others interested will be received at the hall on the day of the sale.

The Ladies of St. Luke's church will hold a tea and sale of home cooking in the Elks' hall on Saturday, 8th of October, from 3 to 6 p.m. Contributions from members and others interested will be received at the hall.

The job of painting the exterior of the United church building is about completed and reflects great credit upon the co-operation of the men of the congregation. The painting has lasted several days. The building is now quite attractive.

Mrs. Lawson and daughter Nettie arrived from Lethbridge the early part of the week and will reside here in future. Mrs. Lawson is engaged with the Knappan Plumbing Co. in installing the heating system in the new Natal-Michel school.

A large congregation attended the United church on Sunday evening last, to hear Mrs. Theresa M. Siegel in her rendition of Henry Van Dyke's "The Mansions." A solo, "One Sweetly Sola Thought," was beautifully rendered by Mrs. S. Bannan.

**"March on Your Stomach"**

THESE words of wisdom are as sound today as when they led Napoleon's armies on to victory.

He realized, that to win, men must have the strength and vigor of abounding health, furnished only by wholesome, nourishing food.

**MOTHER'S BREAD**

is the wholesome, nutritious food of foods, easily transformed into strength and energy.

**The Bellevue Bakery**
